# TREATMENT OPTIONS

In order to achieve optimal wellness and to facilitate the health and vitality of our patients we encourage them to utilize a variety of supportive treatment options.

We offer a wide selection of treatments, each one unique in and of itself but when combined with others can accelerate the healing process.

We have put together a menu of the treatment options available here at Longevity Health Center. These therapies are offered at a reduced price when purchased as a series.

They can be mixed and matched as the patient and the practitioner see fit.

## ACUPUNCTURE:

The placement of acupuncture needles at specific pain points releases endorphins and opioids, the body's natural pain killers, as well as neurotransmitters to the brain. There is also evidence that stimulating acupuncture points may increase the rate of healing to injured areas by reducing inflammation. When pain is relieved, patients feel a greater overall sense of well being, both physically and emotionally.

## FREQUENCY SPECIFIC MICRO-CURRENT:

Frequencies work on the principle of biologic resonance. Frequencies are used to reduce inflammation, pain and organ imbalance. Micro-current frequencies resonate with biologic tissue when the frequency is correct. Once the tissue is changed and stable, it then is able to stay in the new configuration with proper nutritional support.

## LYMPH VITALYZER + THERAPY

- **Far-Infrared Sauna**
- **Ionic Foot Bath**

The Lymphatic System is a central component of the immune system that protects the body by draining and filtering out waste. Any treatments that we can do to encourage vital and active lymph drainage is very helpful. These supportive d-tox therapies encourage active lymph drainage which is an important aspect of health. By utilizing these therapies in addition to your homeopathic and nutritional protocols, you can speed up the healing process. *(Lymph Tx & therapy must be scheduled on same visit)*

## MASSAGE—TARGETED AREA—45min

As an accepted part of physical rehabilitation programs, massage therapy has proven beneficial for many chronic conditions, including low back pain, arthritis, bursitis, fatigue, and more. Many millions will attest, massage also helps relieve the stress and tension of everyday living that can lead to disease and illness. Utilizing massage therapy can greatly enhance your journey to health.

## REFLEXOLOGY

Founded by Dr. William H. Fitzgerald, reflexology maps "zones" on the hands and feet which correlate to specific organs and regions of the body. By stimulating these zones you can reduce stress, improve circulation and enhance health.

## FACIAL REJUVINATION

Facial Rejuvenation is an effective, non-surgical treatment designed to reduce the signs of aging. It is a rejuvenation process designed to help the whole body look and feel younger. Facial Rejuvenation utilizes a micro-current device and possibly the insertion of very thin, disposable needles along the acupuncture points of the face and body. Points are chosen to increase local circulation and stimulate collagen production. This will fill out the lines and give firmness to the skin for a healthy, glowing complexion. Anti-oxidant based creams are driven into the face with the micro-current, further enhancing the rejuvenation process.

## SPA FACIAL w/ MICROCURRENT

Micro-current programs are administered for acne, rosacea and/or anti-aging. Hot towels, acupressure & aromatherapy are implemented within the treatment. Also includes your choice of hand, foot or neck massage.
